

Eco Fairy Friend

Group #4

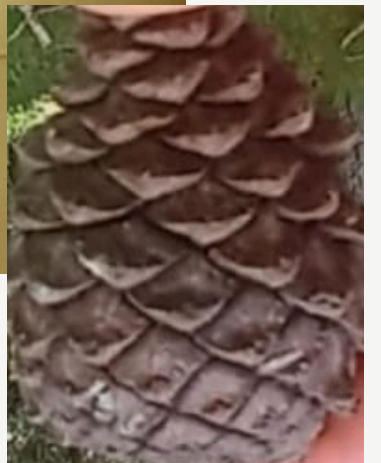

04.07.2025

Eco Fairy Friend

A tiny magical being living in a pinecone helps and teaches you.

The fairy lives inside a pinecone and uses her wand to reveal how a place could look if it were clean and restored, while also sharing the history of the trees and nature around you.

Origin of our Idea

- Found a pine cone in the forest on the hike in the mountains
- Our imagination: combining a fairy living in a pine cone and the eagle flying in the sky

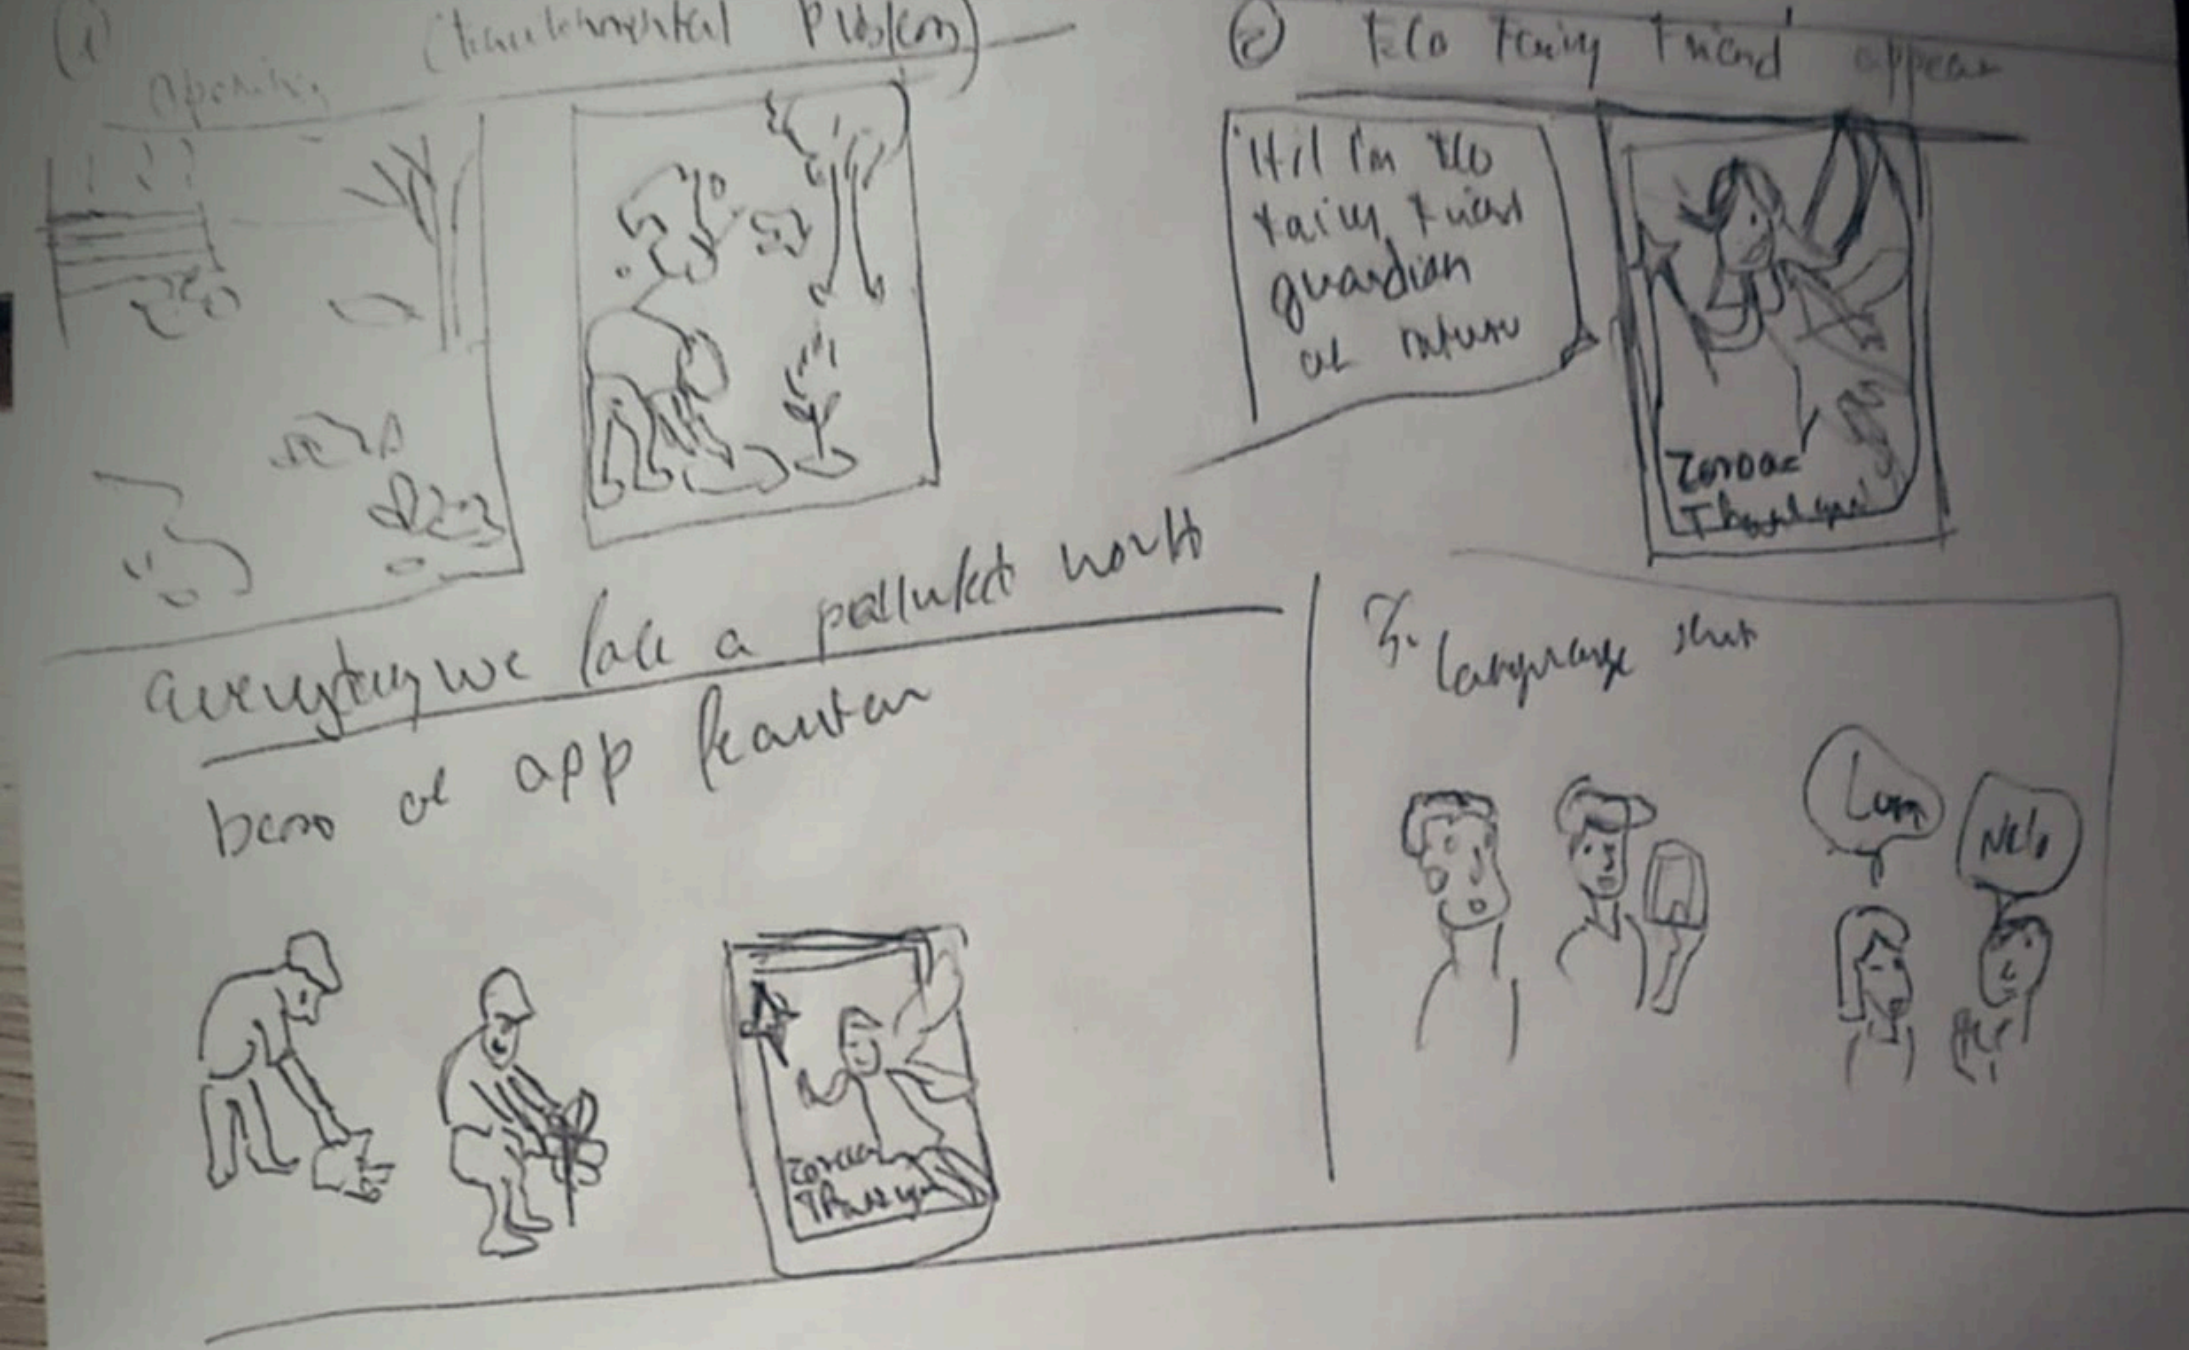

Eco challenges

Small challenges how to help the nature come up.

You earn rewards (AR magic wards, nature language words) for eco-actions like planting trees or picking up litter.

Main goal: inspire change through human connection and sensitivity.

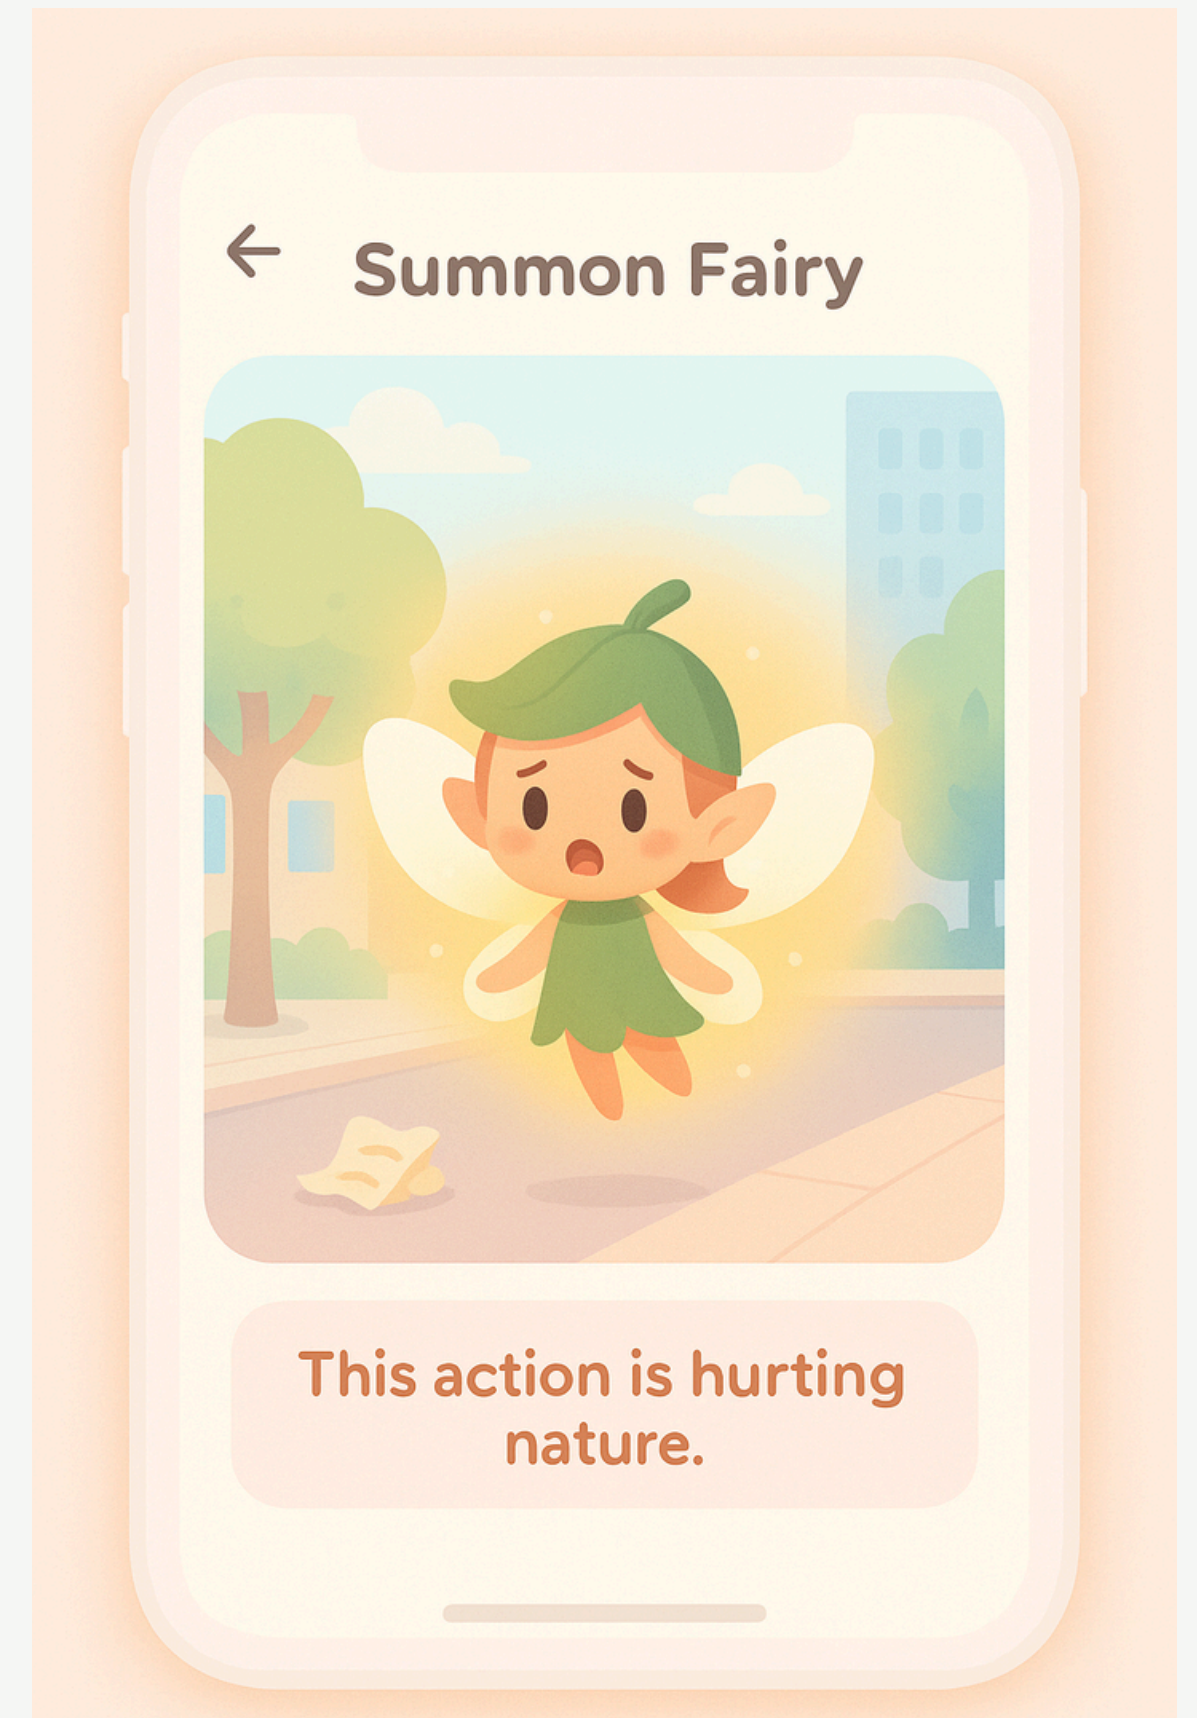

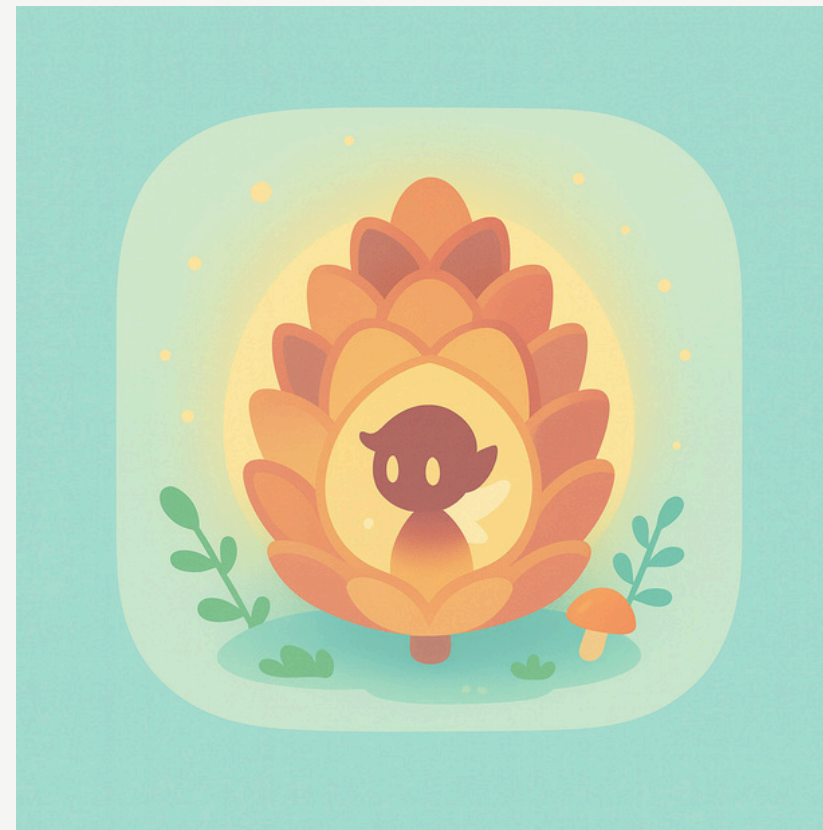

Main Goal

A technical solution for everyone, designed to inspire real-world eco-actions through magical, playful experiences—wherever you are (city, forest, or your bedroom).

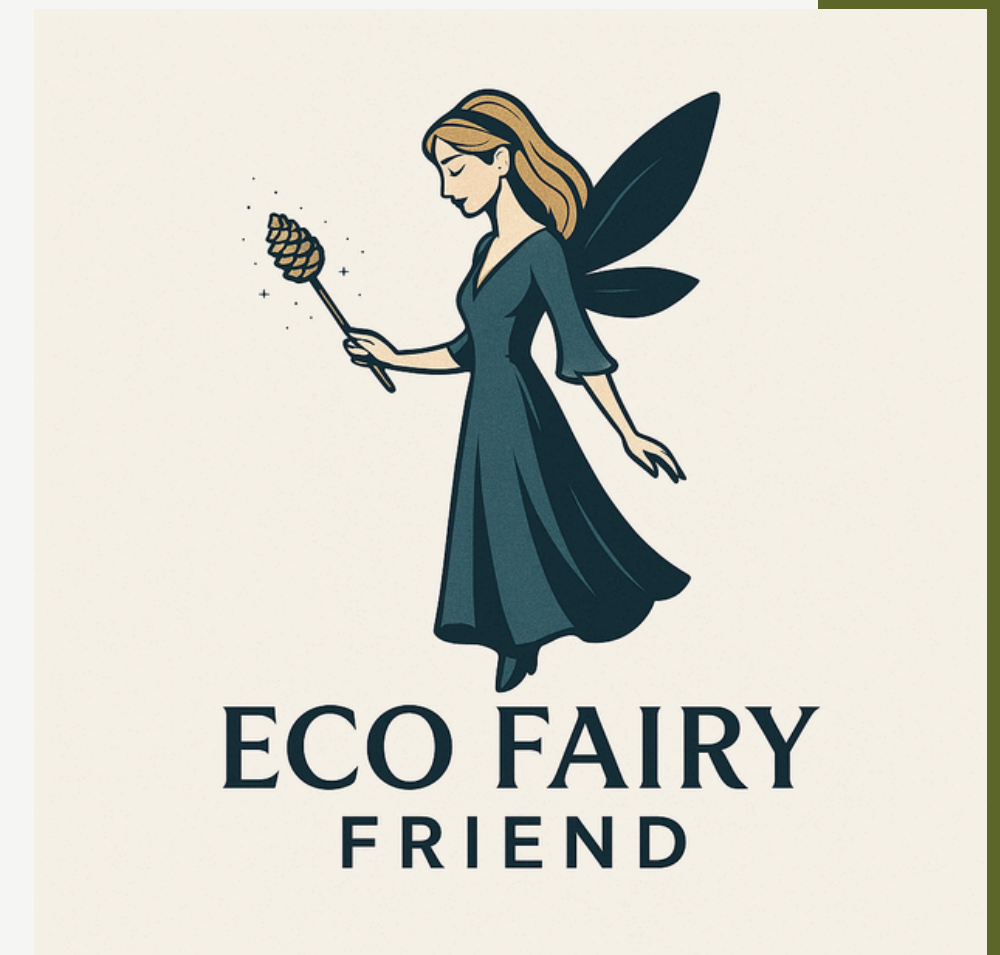

How it could look like ...

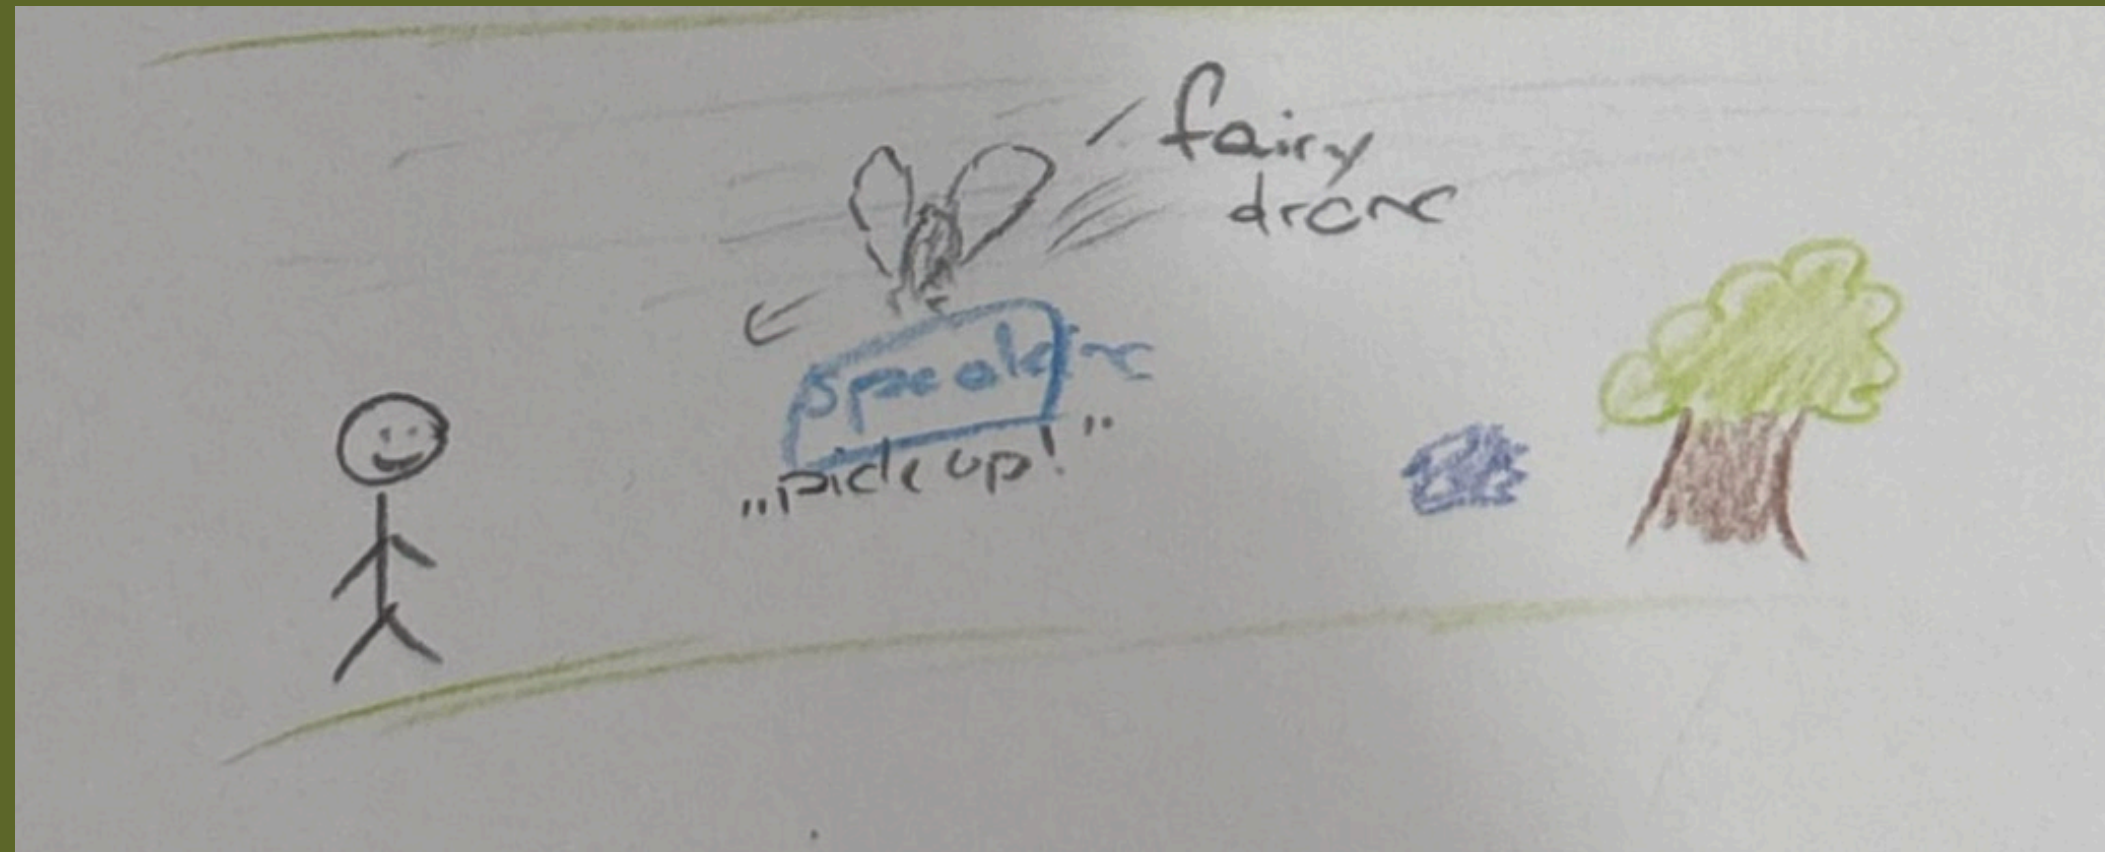

Shared Journey with the Fairy

- Give small suggestions (challenges) on how to support nature
- Support the path of becoming an ecologically aware person (become a fairy)
- The fairy explains the impact of your actions

Fariy as a Flying Drone

The Fairy is flying and speaking to you, as both the most interesting and realistic experience.

Motivation and Rewards

- Rewards and showing the impact of accomplished challenges

By picking up this
piece of trash, you
might have saved an
animals' live

THANK
you
